

## CHAPTER 1

|  |    |
|--|----|
| Geometry in Regions of a Space. Basic Concepts                 | 1  |
| §1. Co-ordinate systems  | 1  |
| 1.1. Cartesian co-ordinates in a space                         | 2  |
| 1.2. Co-ordinate changes                                       | 3  |
| §2. Euclidean space  | 9  |
| 2.1. Curves in Euclidean space                                 | 9  |
| 2.2. Quadratic forms and vectors                               | 14 |
| §3. Riemannian and pseudo-Riemannian spaces                    | 17 |
| 3.1. Riemannian metrics  | 17 |
| 3.2. The Minkowski metric                                      | 20 |
| §4. The simplest groups of transformations of Euclidean space  | 23 |
| 4.1. Groups of transformations of a region                     | 23 |
| 4.2. Transformations of the plane                              | 25 |
| 4.3. The isometries of 3-dimensional Euclidean space           | 31 |
| 4.4. Further examples of transformation groups                 | 34 |
| 4.5. Exercises   | 37 |
| §5. The Serret-Frenet formulae                                 | 38 |
| 5.1. Curvature of curves in the Euclidean plane                | 38 |
| 5.2. Curves in Euclidean 3-space. Curvature and torsion        | 42 |
| 5.3. Orthogonal transformations depending on a parameter       | 47 |
| 5.4. Exercises   | 48 |
| §6. Pseudo-Euclidean spaces                                    | 50 |
| 6.1. The simplest concepts of the special theory of relativity | 50 |
| 6.2. Lorentz transformations                                   | 52 |
| 6.3. Exercises   | 60 |

## CHAPTER 2

### The Theory of Surfaces

|   |     |
|---|-----|
| §7. Geometry on a surface in space  | 61  |
| 7.1. Co-ordinates on a surface  | 61  |
| 7.2. Tangent planes   | 66  |
| 7.3. The metric on a surface in Euclidean space   | 68  |
| 7.4. Surface area   | 72  |
| 7.5. Exercises  | 76  |
| §8. The second fundamental form   | 76  |
| 8.1. Curvature of curves on a surface in Euclidean space                                      | 76  |
| 8.2. Invariants of a pair of quadratic forms  | 79  |
| 8.3. Properties of the second fundamental form  | 80  |
| 8.4. Exercises  | 86  |
| §9. The metric on the sphere  | 86  |
| §10. Space-like surfaces in pseudo-Euclidean space  | 90  |
| 10.1. The pseudo-sphere   | 90  |
| 10.2. Curvature of space-like curves in $\mathbb{R}_1^3$                                      | 94  |
| §11. The language of complex numbers in geometry  | 95  |
| 11.1. Complex and real co-ordinates   | 95  |
| 11.2. The Hermitian scalar product  | 97  |
| 11.3. Examples of complex transformation groups   | 99  |
| §12. Analytic functions   | 100 |
| 12.1. Complex notation for the element of length, and for the differential of a function      | 100 |
| 12.2. Complex co-ordinate changes   | 104 |
| 12.3. Surfaces in complex space   | 106 |
| §13. The conformal form of the metric on a surface  | 109 |
| 13.1. Isothermal co-ordinates. Gaussian curvature in terms of conformal co-ordinates          | 109 |
| 13.2. Conformal form of the metrics on the sphere and the Lobachevskian plane                 | 114 |
| 13.3. Surfaces of constant curvature  | 117 |
| 13.4. Exercises   | 120 |
| §14. Transformation groups as surfaces in $N$ -dimensional space                              | 120 |
| 14.1. Co-ordinates in a neighbourhood of the identity   | 120 |
| 14.2. The exponential function with matrix argument   | 127 |
| 14.3. The quaternions   | 131 |
| 14.4. Exercises   | 136 |
| §15. Conformal transformations of Euclidean and pseudo-Euclidean spaces of several dimensions | 136 |

## CHAPTER 3

### Tensors: The Algebraic Theory

|  |     |
|--|-----|
| §16. Examples of tensors   | 145 |
| §17. The general definition of a tensor  | 151 |
| 17.1. The transformation rule for the components of a tensor of arbitrary rank | 151 |

|   |     |
|---|-----|
| 17.2. Algebraic operations on tensors   | 157 |
| 17.3. Exercises   | 161 |
| §18. Tensors of type $(0, k)$   | 161 |
| 18.1. Differential notation for tensors with lower indices only   | 161 |
| 18.2. Skew-symmetric tensors of type $(0, k)$   | 164 |
| 18.3. The exterior product of differential forms. The exterior algebra  | 166 |
| 18.4. Skew-symmetric tensors of type $(k, 0)$ (polyvectors). Integrals with respect to anti-commuting variables                     | 167 |
| 18.5. Exercises   | 170 |
| §19. Tensors in Riemannian and pseudo-Riemannian spaces   | 170 |
| 19.1. Raising and lowering indices  | 170 |
| 19.2. The eigenvalues of a quadratic form   | 172 |
| 19.3. The operator $*$  | 174 |
| 19.4. Tensors in Euclidean space  | 174 |
| 19.5. Exercises   | 175 |
| §20. The crystallographic groups and the finite subgroups of the rotation group of Euclidean 3-space. Examples of invariant tensors | 176 |
| §21. Rank 2 tensors in pseudo-Euclidean space, and their eigenvalues  | 197 |
| 21.1. Skew-symmetric tensors. The invariants of an electromagnetic field  | 197 |
| 21.2. Symmetric tensors and their eigenvalues. The energy-momentum tensor of an electromagnetic field                               | 202 |
| §22. The behaviour of tensors under mappings  | 205 |
| 22.1. The general operation of restriction of tensors with lower indices  | 205 |
| 22.2. Mappings of tangent spaces  | 207 |
| §23. Vector fields  | 208 |
| 23.1. One-parameter groups of diffeomorphisms   | 208 |
| 23.2. The exponential function of a vector field  | 210 |
| 23.3. The Lie derivative  | 211 |
| 23.4. Exercises   | 215 |
| §24. Lie algebras   | 216 |
| 24.1. Lie algebras and vector fields  | 216 |
| 24.2. The fundamental matrix Lie algebras   | 218 |
| 24.3. Linear vector fields  | 223 |
| 24.4. Left-invariant fields defined on transformation groups  | 225 |
| 24.5. Invariant metrics on a transformation group   | 227 |
| 24.6. The classification of the 3-dimensional Lie algebras  | 229 |
| 24.7. The Lie algebras of the conformal groups  | 231 |
| 24.8. Exercises   | 236 |

## CHAPTER 4

|   |     |
|---|-----|
| The Differential Calculus of Tensors                      | 238 |
| §25. The differential calculus of skew-symmetric tensors  | 238 |
| 25.1. The gradient of a skew-symmetric tensor             | 238 |
| 25.2. The exterior derivative of a form                   | 241 |
| 25.3. Exercises   | 247 |
| §26. Skew-symmetric tensors and the theory of integration | 248 |
| 26.1. Integration of differential forms                   | 248 |

|       |   |     |
|-------|---|-----|
| 26.2. | Examples of integrals of differential forms   | 254 |
| 26.3. | The general Stokes formula. Examples  | 259 |
| 26.4. | Proof of the general Stokes formula for the cube  | 267 |
| 26.5. | Exercises   | 269 |
| §27.  | Differential forms on complex spaces  | 270 |
| 27.1. | The operators $d'$ and $d''$  | 270 |
| 27.2. | Kählerian metrics. The curvature form   | 273 |
| §28.  | Covariant differentiation   | 275 |
| 28.1. | Euclidean connexions  | 275 |
| 28.2. | Covariant differentiation of tensors of arbitrary rank  | 284 |
| §29.  | Covariant differentiation and the metric  | 288 |
| 29.1. | Parallel transport of vector fields   | 288 |
| 29.2. | Geodesics   | 290 |
| 29.3. | Connexions compatible with the metric   | 291 |
| 29.4. | Connexions compatible with a complex structure (Hermitian metric)   | 295 |
| 29.5. | Exercises   | 297 |
| §30.  | The curvature tensor  | 299 |
| 30.1. | The general curvature tensor  | 299 |
| 30.2. | The symmetries of the curvature tensor. The curvature tensor defined by the metric                            | 304 |
| 30.3. | Examples: The curvature tensor in spaces of dimensions 2 and 3; the curvature tensor of transformation groups | 306 |
| 30.4. | The Peterson–Codazzi equations. Surfaces of constant negative curvature, and the “sine–Gordon” equation       | 311 |
| 30.5. | Exercises   | 314 |

## CHAPTER 5

|       |   |     |
|-------|---|-----|
|       | The Elements of the Calculus of Variations                                  | 317 |
| §31.  | One-dimensional variational problems  | 317 |
| 31.1. | The Euler–Lagrange equations  | 317 |
| 31.2. | Basic examples of functionals   | 321 |
| §32.  | Conservation laws   | 324 |
| 32.1. | Groups of transformations preserving a given variational problem            | 324 |
| 32.2. | Examples. Applications of the conservation laws                             | 326 |
| §33.  | Hamiltonian formalism   | 337 |
| 33.1. | Legendre’s transformation   | 337 |
| 33.2. | Moving co-ordinate frames   | 340 |
| 33.3. | The principles of Maupertuis and Fermat                                     | 345 |
| 33.4. | Exercises   | 348 |
| §34.  | The geometrical theory of phase space                                       | 348 |
| 34.1. | Gradient systems  | 348 |
| 34.2. | The Poisson bracket   | 352 |
| 34.3. | Canonical transformations   | 358 |
| 34.4. | Exercises   | 362 |
| §35.  | Lagrange surfaces   | 362 |
| 35.1. | Bundles of trajectories and the Hamilton–Jacobi equation                    | 362 |
| 35.2. | Hamiltonians which are first-order homogeneous with respect to the momentum | 367 |

|  |     |
|--|-----|
| §36. The second variation for the equation of the geodesics  | 371 |
| 36.1. The formula for the second variation   | 371 |
| 36.2. Conjugate points and the minimality condition  | 375 |
| <br>   |     |
| CHAPTER 6  |     |
| The Calculus of Variations in Several Dimensions.  |     |
| Fields and Their Geometric Invariants  | 379 |
| §37. The simplest higher-dimensional variational problems  | 379 |
| 37.1. The Euler–Lagrange equations   | 379 |
| 37.2. The energy-momentum tensor   | 383 |
| 37.3. The equations of an electromagnetic field  | 388 |
| 37.4. The equations of a gravitational field   | 394 |
| 37.5. Soap films   | 401 |
| 37.6. Equilibrium equation for a thin plate  | 407 |
| 37.7. Exercises  | 412 |
| §38. Examples of Lagrangians   | 413 |
| §39. The simplest concepts of the general theory of relativity   | 416 |
| §40. The spinor representations of the groups $SO(3)$ and $O(3, 1)$ .  |     |
| Dirac's equation and its properties  | 431 |
| 40.1. Automorphisms of matrix algebras   | 431 |
| 40.2. The spinor representation of the group $SO(3)$   | 433 |
| 40.3. The spinor representation of the Lorentz group   | 435 |
| 40.4. Dirac's equation   | 439 |
| 40.5. Dirac's equation in an electromagnetic field. The operation<br>of charge conjugation   | 441 |
| §41. Covariant differentiation of fields with arbitrary symmetry   | 443 |
| 41.1. Gauge transformations. Gauge-invariant Lagrangians   | 443 |
| 41.2. The curvature form   | 447 |
| 41.3. Basic examples   | 448 |
| §42. Examples of gauge-invariant functionals. Maxwell's equations and<br>the Yang–Mills equation. Functionals with identically zero<br>variational derivative (characteristic classes) | 453 |
| <br>   |     |
| Bibliography   | 459 |
| Index  | 463 |
