Introduction	v
The Theory of Invariants of Multidimensional Integrable Hamiltonian Systems (with Arbitrary Many Degrees of Freedom). Molecular Table of All Integrable Systems with Two Degrees of Freedom A. T. FOMENKO	1
Integrable Hamiltonian Systems in Analytic Dynamics and Mathematical Physics G. G. OKUNEVA	37
Fomenko Invariants for the Main Integrable Cases of the Rigid Body Motion Equations A. A. OSHEMKOV	67
Methods of Calculation of the Fomenko-Zieschang Invariant A. V. BOLSINOV	147
Topological Invariants for Some Algebraic Analogs of the Toda Lattice L. S. POLYAKOVA	185
Topological Classification of Integrable Bott Geodesic Flows on the Two-Dimensional Torus E. N. SELIVANOVA	209
On the Complexity of Integrable Hamiltonian Systems on Three-Dimensional Isoenergy Submanifolds T. Z. NGUYEN	229
Symplectic Connections and Maslov-Arnold Characteristic Classes V. V. TROFIMOV	257
Topological Classification of Integrable Nondegenerate Hamiltonians on the Isoenergy Three-Dimensional Sphere A. T. FOMENKO and T. Z. NGUYEN	267

- Description of the Structure of Fomenko Invariants on the Boundary and inside  $Q$ -Domains, Estimates of Their Number on the Lower Boundary for the Manifolds  $S^3$ ,  $\mathbb{R}P^3$ ,  $S^1 \times S^2$ , and  $T^3$**   
**V. V. KALASHNIKOV (JUNIOR)** 297
- Theory of Rough Classification of Integrable Nondegenerate Hamiltonian Differential Equations on Four-Dimensional Manifolds. Application to Classical Mechanics**  
**A. T. FOMENKO** 305
