

| | | |
|----------|---|-----------|
| 1 | Introduction to Differential Geometry | 1 |
| 1.1 | Curvilinear Coordinate Systems. Simplest Examples | 1 |
| 1.1.1 | Motivation | 1 |
| 1.1.2 | Cartesian and curvilinear coordinates | 3 |
| 1.1.3 | Simplest examples of curvilinear coordinate systems | 7 |
| 1.2 | The Length of a Curve in Curvilinear Coordinates | 10 |
| 1.2.1 | The length of a curve in Euclidean coordinates | 10 |
| 1.2.2 | The length of a curve in curvilinear coordinates | 12 |
| 1.2.3 | Concept of a Riemannian metric in a domain of Euclidean space | 15 |
| 1.2.4 | Indefinite metrics | 18 |
| 1.3 | Geometry on the Sphere and Plane | 20 |
| 1.4 | Pseudo-Sphere and Lobachevskii Geometry | 25 |
| 2 | General Topology | 39 |
| 2.1 | Definitions and Simplest Properties of Metric and Topological Spaces | 39 |
| 2.1.1 | Metric spaces | 39 |
| 2.1.2 | Topological spaces | 40 |
| 2.1.3 | Continuous mappings | 42 |
| 2.1.4 | Quotient topology | 44 |
| 2.2 | Connectedness. Separation Axioms | 45 |
| 2.2.1 | Connectedness | 45 |
| 2.2.2 | Separation axioms | 47 |
| 2.3 | Compact Spaces | 49 |
| 2.3.1 | Compact spaces | 49 |
| 2.3.2 | Properties of compact spaces | 50 |
| 2.3.3 | Compact metric spaces | 51 |
| 2.3.4 | Operations on compact spaces | 51 |

| | | |
|----------|--|-----------|
| 2.4 | Functional Separability. Partition of Unity | 51 |
| 2.4.1 | Functional separability | 52 |
| 2.4.2 | Partition of unity | 54 |
| 3 | Smooth Manifolds (General Theory) | 57 |
| 3.1 | Concept of a Manifold | 59 |
| 3.1.1 | Main definitions | 59 |
| 3.1.2 | Functions of change of coordinates. Definition of a smooth manifold | 62 |
| 3.1.3 | Smooth mappings. Diffeomorphism | 65 |
| 3.2 | Assignment of Manifolds by Equations | 68 |
| 3.3 | Tangent Vectors. Tangent Space | 72 |
| 3.3.1 | Simplest examples | 72 |
| 3.3.2 | General definition of tangent vector | 74 |
| 3.3.3 | Tangent space $T_{P_0}(M)$ | 75 |
| 3.3.4 | Directional derivative of a function | 76 |
| 3.3.5 | Tangent bundle | 79 |
| 3.4 | Submanifolds | 81 |
| 3.4.1 | Differential of a smooth mapping | 81 |
| 3.4.2 | Local properties of mappings and the differential | 84 |
| 3.4.3 | Embedding of manifolds in Euclidean space | 85 |
| 3.4.4 | Riemannian metric on a manifold | 87 |
| 3.4.5 | Sard theorem | 89 |
| 4 | Smooth Manifolds (Examples) | 93 |
| 4.1 | Theory of Curves on the Plane and in the Three- Dimensional Space | 93 |
| 4.1.1 | Theory of curves on the plane. Frénet formulae | 93 |
| 4.1.2 | Theory of spatial curves. Frénet formulae | 98 |
| 4.2 | Surfaces. First and Second Quadratic Forms | 102 |
| 4.2.1 | First quadratic form | 102 |
| 4.2.2 | Second quadratic form | 104 |
| 4.2.3 | Elementary theory of smooth curves on a hypersurface | 108 |
| 4.2.4 | Gaussian and mean curvatures of two-dimensional surfaces | 112 |
| 4.3 | Transformation Groups | 121 |
| 4.3.1 | Simplest examples of transformation groups | 121 |
| 4.3.2 | Matrix transformation groups | 131 |
| 4.3.3 | General linear group | 132 |
| 4.3.4 | Special linear group | 132 |

| | | |
|----------|---|------------|
| 4.3.5 | Orthogonal group | 133 |
| 4.3.6 | Unitary group and special unitary group | 134 |
| 4.3.7 | Symplectic compact and noncompact groups | 137 |
| 4.4 | Dynamical Systems | 140 |
| 4.5 | Classification of Two-Dimensional Surfaces | 149 |
| 4.5.1 | Manifolds with boundary | 150 |
| 4.5.2 | Orientable manifolds | 151 |
| 4.5.3 | Classification of two-dimensional manifolds | 153 |
| 4.6 | Two-Dimensional Manifolds as Riemann Surfaces of Algebraic Functions | 163 |
| 5 | Tensor Analysis | 173 |
| 5.1 | General Concept of Tensor Field on a Manifold | 173 |
| 5.2 | Simplest Examples of Tensor Fields | 177 |
| 5.2.1 | Examples | 177 |
| 5.2.2 | Algebraic operations on tensors | 180 |
| 5.2.3 | Skew-symmetric tensors | 183 |
| 5.3 | Connection and Covariant Differentiation | 189 |
| 5.3.1 | Definition and properties of affine connection | 189 |
| 5.3.2 | Riemannian connections | 195 |
| 5.4 | Parallel Translation. Geodesics | 198 |
| 5.4.1 | Preparatory remarks | 198 |
| 5.4.2 | Equation of parallel translation | 199 |
| 5.4.3 | Geodesics | 201 |
| 5.5 | Curvature Tensor | 210 |
| 5.5.1 | Preparatory remarks | 210 |
| 5.5.2 | Coordinate definition of the curvature tensor | 210 |
| 5.5.3 | Invariant definition of the curvature tensor | 211 |
| 5.5.4 | Algebraic properties of the Riemannian curvature tensor | 212 |
| 5.5.5 | Some applications of the Riemannian curvature tensor | 215 |
| 6 | Homology Theory | 219 |
| 6.1 | Calculus of Differential Forms. Cohomologies | 220 |
| 6.1.1 | Differential properties of exterior forms | 220 |
| 6.1.2 | Cohomologies of a smooth manifold (de Rham cohomologies) | 225 |
| 6.1.3 | Homotopic properties of cohomology groups | 227 |
| 6.2 | Integration of Exterior Forms | 231 |
| 6.2.1 | Integral of a differential form over a manifold | 231 |

| | | |
|----------|---|------------|
| 6.2.2 | Stokes formula | 232 |
| 6.3 | Degree of a Mapping and Its Applications | 236 |
| 6.3.1 | Degree of a mapping | 236 |
| 6.3.2 | Main theorem of algebra | 238 |
| 6.3.3 | Integration of forms | 239 |
| 6.3.4 | Gaussian mapping of a hypersurface | 239 |
| 7 | Simplest Variational Problems of Riemannian Geometry | 241 |
| 7.1 | Concept of Functional. Extremal Functions. Euler Equation . . | 241 |
| 7.2 | Extremality of Geodesics | 247 |
| 7.3 | Minimal Surfaces | 250 |
| 7.4 | Calculus of Variations and Symplectic Geometry | 253 |
