Preface	vii
Chapter 1. C^* -Algebras and K -Theory	1
1.1. Some facts from homological algebra	1
1.2. C^* -Hilbert modules	5
1.3. K -Theory of C^* -bundles	16
1.4. Foundations of KK -theory	68
Chapter 2. Index Theorems	73
2.1. Pseudodifferential operators	73
2.2. The C^* -index theorem	106
2.3. The Atiyah–Singer theorem	118
Chapter 3. The Higher Signatures	121
3.1. Characteristic classes	121
3.2. Higher signatures of manifolds	126
3.3. Hermitian K -theory and Fredholm representations	128
3.4. Generalized Hirzebruch formulas	133
3.5. Mishchenko’s theorem	140
3.6. Bruhat–Tits buildings and higher signatures	143
3.7. Higher signatures and KK -theory	152
3.8. Spinor manifolds, curvature and A -bundles	157
Chapter 4. Noncommutative Differential Geometry	161
4.1. Cyclic and dihedral homology	161
4.2. Chern character, index, and Lefschetz numbers	188
4.3. The Connes–Moscovici theorem	199
Bibliography	205
Index	211
