

Preface to the English Edition . . . . .	8
Preface to the Russian Edition . . . . .	9
<b>Chapter 1. INTRODUCTION TO DIFFERENTIAL GEOMETRY . . . . .</b>	<b>12</b>
1.1. Curvilinear Coordinate Systems. Simple Examples . . . . .	12
1.1.1. Background . . . . .	12
1.1.2. Cartesian and Curvilinear Coordinates . . . . .	15
1.1.3. Simple Examples of Curvilinear Coordinate Systems . . . . .	21
1.2. The Length of Curve in a Curvilinear Coordinate System . . . . .	25
1.2.1. The Length of Curve in a Euclidean Coordinate System . . . . .	25
1.2.2. The Length of Curve in a Curvilinear Coordinate System . . . . .	28
1.2.3. The Concept of the Riemannian Metric in a Euclidean Domain . . . . .	32
1.2.4. Indefinite Metrics . . . . .	35
1.3. Geometry on a Sphere and on a Plane . . . . .	38
1.4. Pseudosphere and Lobachevskian Geometry . . . . .	46
<b>Chapter 2. GENERAL TOPOLOGY . . . . .</b>	<b>67</b>
2.1. Definition and Basic Properties of Metric and Topological Spaces . . . . .	67
2.1.1. Metric Spaces . . . . .	67
2.1.2. Topological Spaces . . . . .	70
2.1.3. Continuous Mappings . . . . .	72
2.2. Connectedness. Separation Axioms . . . . .	76
2.2.1. Connectedness . . . . .	77
2.2.2. Separation Axioms . . . . .	79
2.3. Compact Spaces . . . . .	82
2.3.1. Definition . . . . .	82
2.3.2. The Properties of Compact Spaces . . . . .	83
2.3.3. Metric Compact Spaces . . . . .	84
2.3.4. Operations Over Compact Spaces . . . . .	86
2.4. Functional Separability. Partition of Unity . . . . .	87
2.4.1. Functional Separability . . . . .	87
2.4.2. Partition of Unity . . . . .	90
<b>Chapter 3. SMOOTH MANIFOLDS (GENERAL THEORY) . . . . .</b>	<b>92</b>
Introduction . . . . .	92
3.1. The Concept of a Manifold . . . . .	93
3.1.1. Fundamental Definitions . . . . .	93

3.1.2. Functions of Coordinate Transformation. Definition of a Smooth Manifold . . . . .	98
3.1.3. Smooth Manifolds. Diffeomorphism . . . . .	104
3.2. Definition of Manifolds by Equations . . . . .	108
3.3. Tangent Vectors. Tangent Space . . . . .	113
3.3.1. Simple Examples . . . . .	113
3.3.2. General Definition of a Tangent Vector . . . . .	117
3.3.3. Tangent Space $T_{P_0}(M)$ . . . . .	118
3.3.4. Sheaf of Tangent Curves . . . . .	120
3.3.5. Directional Derivative of a Function . . . . .	122
3.3.6. Tangent Bundles . . . . .	127
3.4. Submanifolds . . . . .	129
3.4.1. Differential of a Smooth Manifold . . . . .	130
3.4.2. Differential and Local Properties of Mappings . . . . .	135
3.4.3. Sard's Theorem . . . . .	138
3.4.4. Embedding of Manifolds in a Euclidean Space . . . . .	141
<b>Chapter 4. SMOOTH MANIFOLDS (EXAMPLES) . . . . .</b>	<b>147</b>
4.1. The Theory of Curves on a Plane and in a Three-Dimensional Space . . . . .	147
4.1.1. The Theory of Curves on a Plane. Frenet Formulas . . . . .	147
4.1.2. The Theory of Spatial Curves. Frenet Formulas . . . . .	154
4.2. Surfaces. First and Second Fundamental Forms . . . . .	160
4.2.1. The First Fundamental Form . . . . .	160
4.2.2. The Second Fundamental Form . . . . .	163
4.2.3. An Elementary Theory of Smooth Curves on a Hypersurface . . . . .	169
4.2.4. The Gaussian and Mean Curvatures of a Two-Dimensional Surface . . . . .	178
4.3. Transformation Groups . . . . .	200
4.3.1. Simple Examples of Transformation Groups . . . . .	200
4.3.2. Matrix Transformation Groups . . . . .	215
4.4. Dynamical Systems . . . . .	229
4.5. Classification of Two-Dimensional Surfaces . . . . .	246
4.5.1. Manifolds with Boundary . . . . .	247
4.5.2. Orientable Manifolds . . . . .	249
4.6. Riemannian Surfaces of Algebraic Functions . . . . .	270
<b>Chapter 5. TENSOR ANALYSIS AND RIEMANNIAN GEOMETRY . . . . .</b>	<b>294</b>
5.1. The General Concept of a Tensor Field on a Manifold . . . . .	294
5.2. Simple Tensor Fields . . . . .	300
5.2.1. Examples . . . . .	300
5.2.2. Algebraic Operations over Tensors . . . . .	305
5.2.3. Skew-Symmetric Tensors . . . . .	309
5.3. Connection and Covariant Differentiation . . . . .	322
5.3.1. The Definition and Properties of Affine Connection . . . . .	322
5.3.2. Riemannian Connections . . . . .	332
5.4. Parallel Displacement. Geodesics . . . . .	336
5.4.1. Preliminaries . . . . .	336
5.4.2. The Equation of Parallel Displacement . . . . .	339
5.4.3. Geodesics . . . . .	341
5.5. Curvature Tensor . . . . .	357
5.5.1. Preliminaries . . . . .	357
5.5.2. Coordinate Definition of the Curvature Tensor . . . . .	360

5.5.3. Invariant Definition of the Curvature Tensor . . . . .	361
5.5.4. Algebraic Properties of the Riemann Curvature Tensor	362
5.5.5. Certain Applications of the Riemann Curvature Tensor	366
<b>Chapter 6. HOMOLOGY THEORY . . . . .</b>	<b>371</b>
6.1. Calculus of Exterior Differential Forms. Cohomology Groups	372
6.1.1. Differentiation of Exterior Differential Forms . . . . .	372
6.1.2. Cohomology Groups of a Smooth Manifold (the de Rham Cohomology Groups) . . . . .	378
6.1.3. Homotopic Properties of Cohomology Groups . . . . .	381
6.2. Integration of Exterior Forms . . . . .	387
6.2.1. The Integral of a Differential Form over a Manifold . . . . .	388
6.2.2. Stokes' Theorem . . . . .	393
6.3. The Degree of Mapping and Its Applications . . . . .	399
6.3.1. Example . . . . .	399
6.3.2. The Degree of Mapping . . . . .	400
6.3.3. The Fundamental Theorem of Algebra . . . . .	402
6.3.4. Integration of Forms . . . . .	403
6.3.5. Gaussian Mapping of a Hypersurface . . . . .	404
<b>Chapter 7. SIMPLE VARIATIONAL PROBLEMS IN RIEMANNIAN GEOMETRY . . . . .</b>	<b>407</b>
7.1. Functional. Extremal Functions. Euler's Equations . . . . .	407
7.2. Extremality of Geodesics . . . . .	416
7.3. Minimal Surfaces . . . . .	424
7.4. Calculus of Variations and Symplectic Geometry . . . . .	430
<b>Name Index . . . . .</b>	<b>451</b>
<b>Subject Index . . . . .</b>	<b>452</b>
